Panda Global Protection 2016

Protect your privacy and keep your devices under control

Maximum protection for all devices

Everything you need to protect your PC, Mac® or Android™, your data and family against all types of threats, even those as yet undiscovered, is included in our antivirus software.

Enjoy real-time protection against the latest malware. Browse, shop and play online with complete peace of mind.

Manage your passwords

The password manager is extremely user-friendly and allows you to manage all your online access by simply remembering one master password. You will never forget a password again!

Optimize your devices

Our antivirus includes a tune-up feature that cleans out cookies and unnecessary temporary files that slow down your PC. Additionally, it removes invalid registry keys and improves the computer's startup time. You can also optimize your Android™ devices, improving performance and battery life.

Keep your private data secure with file encryption

Your PC, external hard disk or USB drive often contain documents that you would not want to end up in the wrong hands.

Store all your important documents securely and enjoy peace of mind knowing your information is private. You can also delete files securely, so that they cannot be restored even with forensic tools or hacking techniques.

Protect your family with parental controls

Our antivirus software protects your family from inappropriate content online (pornography, drugs, weapons, etc.). Parental control gives your kids the freedom to use the Internet, at the same time flagging any behavior you feel is inappropriate.

PROTECTING AND SIMPLIFYING YOUR LIFE

- Shop and browse online safely.
- Keep your family safe from inappropriate Web content.
- Protect your data, money and identity from cyber-criminals.
- Optimize and keep all your devices under control.
- Protect yourself anytime, anywhere.
