

# Panda Mobile Security

Maximum protection for your Android™ devices

How do you connect to the Internet? Smartphone, tablet, Smart TV? It doesn't matter, Panda Mobile Security Advanced protects all your Android™ devices.

Do you know why you have to protect your mobile devices?

- 1 Mobile devices are in the crosshairs of cybercriminals for a simple reason: They are very popular. This increase in use is attractive for cybercriminals.
- 2 These devices are increasingly valuable for thieves: We store confidential and personal information on them.
- 3 Laboratories and experts agree that mobile platforms are the primary target for new malware. There are now million malicious applications infecting Android devices globally.

**Antivirus Protection**

## Minimum System Requirements:

- ✓ Android 2.2 or later
- ✓ Internet connection

**Panda Mobile Security** provides maximum protection against all kinds of threats, and allows you to remotely locate your Android™ devices, lock them or erase their contents. Enjoying your online life has never been easier!

### The best security for your Android™ devices.

Maximum protection for your devices.

Enjoy your online life with complete peace of mind with Panda Mobile Security Advanced. Maximum antivirus protection for Android™ smartphones, tablets and Smart TV.

- ✓ **Protection against viruses and other threats:** Protect your device against all types of viruses, hackers, trojans and all kinds of threats.
- ✓ **Permanent virus protection:** Automatically analyzes you install new applications or updates of the same without affecting the performance of your device.
- ✓ **SD card scan:** analyzes memory cards SD (Secure Digital) for threats.

### Optimizes performance and manages memory usage.

Manages CPU consumption and memory usage of installed apps on your Android™ devices.

**Panda Mobile Security** analyzes the usage of the apps installed on your device, and reports their size, CPU and memory usage, blocking them if necessary.

### Privacy Auditor – Checks and displays the access permissions of installed apps.

Allows you to control your apps and the permissions they use.

Checks and displays the access permissions of the apps (access to contacts, bank accounts, photos, etc) installed on your Android™ device.

### Anti-Theft - Track the location of your device and lock if lost.

Locate instantly your lost or stolen device.

If you lose your device, you can still retrieve it by using the Panda Mobile Security location system. It tracks and displays on a map your lost or stolen tablet or phone to help you find it quickly. You can remotely lock the device or wipe your personal data to prevent access to your valuable information.

- ✓ **Remote location:** In case of loss or theft is your phone or tablet and visualize in real time on a map.
- ✓ **Remote lock:** lock your device if lost or stolen to prevent unknown people can use it or accessing personal information, even if they have changed the SIM card .
- ✓ **Remote Wipe:** deletes the information stored on the mobile device to prevent access to your sensitive data on the device or SD memory card.
