- **Control of network access:**
It prevents infected, dubious or dangerous computers from connecting to the network and infecting information and files.

Panda Security for Business

"I received same day service upon discovering an unknown virus on my network – disaster averted!"

Anton Dreyer, Application Administrator, Maragon Private Schools

Maragon Private Schools receives top-notch service and protection with Panda Security for Business

Maragon Private Schools is a centre of excellence where internationally-recognized education of the highest quality is provided. Situated in the tranquil area of Ruimsig, It consists of a Pre-Primary, Primary and High school, providing education all the way from grade 00 to grade 12. Maragon prides itself on providing a safe environment for its learners, as well as leading-edge technology and state-of-the-art facilities. Before installing **Panda Security for Business**, Maragon had Trend Micro's Offi cescan installed on their computers. "Although we had no real issues with the software, buying new licences was hugely expensive", explains Anton Dreyer, Application Administrator at Maragon. "The renewal cost 20% more."

Maragon decided to try Panda's solutions, after Dreyer had been impressed by the quality of Panda's online scanning tool, which detected a virus where Trend had failed.

"The marketing team did a great job looking after us. They gave us lots of promotional goods and software", explained Dreyer. "I was impressed by the amount of communication and got the feeling that at least there is someone to phone if you run into a problem."

Maragon chose **Panda Security for Business** for its ease of installation and comprehensive protection for all endpoints. "The software also seems very light on maintenance", adds Dreyer.

Since installing Panda Security for Business, Maragon has seen a big change in cost reduction and maintenance. "It's a great price for the South African market." Dreyer is also particularly impressed with the virus detection. "Being in a school you can imagine that we use USB drives a lot. Probably 90% of all infections arise from there. I became aware of a virus that kept changing, so I sent it into tech support and received a link with the implementation of the fi x the same day! I rate Panda very highly because of this kind of service", he concludes.

About Maragon Private Schools

Maragon Private Schools consist of:

Pre-Primary School : Grade 00 - Grade 0
Primary School : Grade 1 - Grade 7
High School : Grade 8 - Grade 12

Maragon is a centre of excellence where internationally-recognized education of the highest quality is provided.

Over the past ten years the school has grown from 90 pupils to over 1438 .

Pupil/teacher ratios are limited to 25 pupils/teacher. The Pre-School pupil/teacher ratio is effectively 16 pupils/teacher, which includes the qualified assistants. This provides opportunity for the development of knowledge, critical thinking, problem-solving and life skills.

Facilities and buildings are comparable to the best, complemented by an indigenous garden. Development is ongoing, with over 45 000 square metres of sports fields and in excess of 11 000 square meters of classroom space. Classrooms are fully functional with leading-edge technology and state-of-the-art facilities.

The solution: Panda Security for Business

Panda Security for Business is a global security solution for companies that need to protect the workstations and file servers in their corporate networks. It provides the most advanced proactive protection in a multi-tier flexible architecture. Its features include network access and application control.

It is extremely easy to install and use, thanks to its centralized management console **Panda AdminSecure**, and ensures that every single point across the network is protected from all types of Internet threats: viruses, Trojans, spam, spyware, hackers etc.

It includes the innovative **TruPrevent** Technologies to protect workstations against unknown viruses and threats. Both the antivirus and TruPrevent protections are centrally administered.

Panda Security for Business is the only solution that covers all necessary types of protection as an all-in-one solution, eliminating the need to purchase additional security complements in the future.
