

Case Study. Kinepolis Group. Europe.

Details

- Company size: Large Account.
- Sector: Leisure.
- Country: Belgium, Spain, France, Poland and Switzerland.
- Number of licenses: 550

"The installation and distribution on several servers was done in less than 2 days. I didn't have to be on-site. Implementation was very easy and quick. I am very satisfied with the console reports".

Nico Messelis
Support Engineer
Kinepolis

Benefits

Panda Security for Business with Exchange

- **Maximizes Return on Investment:** Provides a converged, single-priced solution complemented with host-based intrusion prevention, access and application control and targeted attack audits.
- **Complete Centralized Monitoring of all Corporate Network Computers:** The AdminSecure management console allows the administrator to manage the global security of the network from one or more points (in the case of additional administrators), optimizing computer productivity and allowing centralized policies to be applied quickly and efficiently.
- **Efficient and Scalable Solution:** The different modules included in each solution offer each company, regardless of its size, the right security level for its system structure.
- **Ensures Corporate Policy Fulfillment and Optimizes Employee Productivity:** It reduces the spam drastically and helps controlling the usage of dangerous or unproductive applications as well as the undesirable content. It allows the configuration of corporate policies and the distribution to all the machines from a central location.
- **Simplifies Risk Management:** Corporate solutions enable automatic in-depth audits to detect hidden malware that could have gone unnoticed during other scans.
- **Protects the Company's Critical Assets:** Proactive technologies provide an additional protection layer against all types of unknown malware, targeted attacks and Internet threats.

The Kinepolis Group chooses Panda Security to protect its network and manage security.

Kinepolis is present in several European countries and provides leisure in its 22 sites to over 23 million spectators a year, which makes it one of the leading groups in the European market. It has over 1,950 employees.

The group wants to offer its users the best cinematographic experience, providing maximum quality and benefits to its clients through innovation and a close relationship. To do so, security is vital for the Kinepolis Group.

Panda Security for Business with Exchange through its AdminSecure centralized management tool and **Panda GateDefender**, **keep the Kinepolis Group threat-free simply and centrally**. As a result, all its applications are operative and provide optimum service to its clients.

They have to secure **450 workstations in 23 different European sites**. *"Our IT department has 4 employees to support all the countries we are present in. In the past, we had to fly from one place to another to solve problems. This is why we started to search for a reliable, efficient and simple solution"* says Messelis. *"We believe viruses are a very serious problem. When the previous solution detected a virus, we had to remove it manually. Panda Security for Business with Exchange and GateDefender free us from many of these manual jobs"*.

*"While we were implementing **Panda Security for Business with Exchange**, it **immediately detected 500 viruses that had not been detected by the previous solution**. I can confirm that **Panda's performance is better than that of the previous solutions**"* explains Messelis. *"Additionally, it saved us a lot of time; in the case of viruses, we save an hour and a half a day compared to the previous solution"*.

Case Study. Kinopolis Group. Europe.

About Kinopolis Group

Since it was founded in 1997, as a result of the merger of the groups Bert and Claeys, it has grown until it has become the leader in Belgium and has obtained a wide presence in the European movie-theater market. It received over 22.6 million spectators in 2005, in the different countries in which it is present.

Solution:

Panda Security for Business with Exchange

- **Unified centralized console.** Thanks to Adminsecure, all the protection modules are managed from a single point.
- **Most Advanced Proactive Technology.** The most recognized proactive technologies composed of intrusion prevention, proactive detection and behavioral analysis.
- **In-Depth Malware Audits.** Malware Radar is capable of uncovering and disinfecting advanced hidden threats.
- **Network access control.** This technology prevents infected, dubious or dangerous computers from connecting to the network and infecting information and files.
- **Anti-Spam for Desktops and Exchange Servers.** Based on Recurrent Pattern Detection™ (RPDTM), a content-agnostic technology that detects and blocks spam in any language.
- **Exhaustive Content Filtering.** Content filters operate either on the content, the information contained in the mail body, or on the mail headers (like "Subject:") to either organize, accept or reject a message.
- **Real-Time Information.** Wide range of detailed detection activity reports which can be customized and configured to be sent periodically to administrators.
- **Centrally Managed Quarantine.** Help controls suspected files and determine the actions to take. It includes the ability to send suspicious files to PandaLabs for analysis.

“Above all, the solution must provide high scalability. At present, we have a solution installed on all computers that are maintenance and administration-free. In the future, we will apply the solution to the 400 PCs in sales outlets.”

Installing Panda Security for Business with Exchange was extremely simple for the Kinopolis Group, while they needed several days to configure their previous solution. **Panda Security offers real “plug & play”**. The excellent console support, in the same language, is also highly appreciated by Messelis: *“I value this support and give it an 80% rating”*.

Panda Security detects all the spyware on the corporate network. Above all, the update frequency is another benefit for the Kinopolis Group. *“We are also satisfied with the training”*, says Messelis.

The Panda Security solutions effectively protect all the layers of Kinopolis’ network, from workstations to file and mail servers and the corporate firewall.
