

Panda Cloud Cleaner Monitor

Do you think your network could be infected, even though your antivirus tells you otherwise?

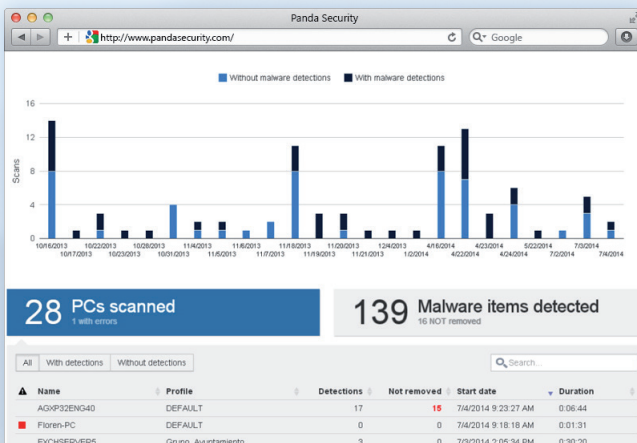

Do you need a centralized tool to disinfect your network remotely?

THEN YOU NEED PANDA CLOUD CLEANER MONITOR

WHAT IS PANDA CLOUD CLEANER MONITOR?

This is an advanced disinfection tool that runs a complete scan based on Collective Intelligence or cloud scanning in order to **eliminate malware that traditional antivirus products are unable to detect.**

The benefits of having 25 years' experience detecting and disinfecting malware have enabled us to develop a solution that can monitor all the scans on your network and eliminate any latest generation viruses detected, remotely and from a centralized point.

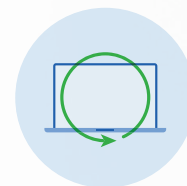

Operating Systems Supported:

- Windows 8 (32-bit and 64-bit)
- Windows 7 (32-bit and 64-bit)
- Windows Vista (32-bit and 64-bit)
- Windows XP SP2 and later (32-bit and 64-bit)
- Windows 2000 Professional
- Server 2003 (32-bit and 64-bit)
- Windows Server 2008, Windows Server 2008 R2
- Windows Server 2012 (32-bit and 64-bit)

MAIN FEATURES & BENEFITS

Includes the latest technologies, which are more aggressive than conventional antivirus solutions in detecting and disinfecting latest threats.

Cuts out the manual tasks of restoring infected systems, automatically undoing the changes made by malware to operating systems and restoring system policies.

Stores all scan and disinfection results in a single cloud-hosted repository for all computers on the network. Access it through a simple Web browser and get the information that you need.
