

Case Study. Spartan Truck Hire. South Africa.

"Excellent products - I recommend them to other companies and clients."

Lee Lloyd
IT Manager
Spartan Truck Hire

Details

Products

- Panda Security for Enterprise
- Panda GateDefender Integra 100

Benefits

Panda Security for Enterprise

- Protection against all types of Internet and email threats, thanks to the combination of the ExchangeSecure and ClientShield 2006 with TruPrevent™ protection modules and Panda GateDefender.
- Simple centralized administration: from a single computer, thanks to the AdminSecure management tool.
- Daily automatic updates and graphic reports about new viruses and their status.
- Telephone Technical Support 24 hours a day, 365 days a year. Our experts are available whenever you need us to resolve any questions.

Panda GateDefender Integra 100

- The Easy-to-use and install appliance. In scans up to six protocols where other appliances can only scan between two and four.
- Designed to offer the highest possible performance in scanning and protection.
- All communications can be managed simultaneously.

All the computers at Spartan Truck Hire, protected by Panda Security.

The story of Spartan Truck Hire has been one of humble beginnings to becoming a major player in South Africa's truck hire market. Through providing an invaluable service to its many clients, Spartan has experienced strong growth over the past 21 years.

To guarantee quality of service, its IT systems must operate perfectly without interruptions caused by malware. To this end, it sought advice from FFG Connection CC, its Internet Service Provider, who recommended Panda Security solutions.

"Until we installed Panda Security, the network was slow and we had problems with viruses," explains Lee Lloyd, the IT Manager at Spartan Truck Hire. "The other security product we used was simply not up to the job."

Spartan Truck Hire has 40 computers and two servers with an ADSL connection. Panda's solutions were chosen to ensure multi-layered protection: Panda GateDefender secures the network's perimeter, while Panda Security for Enterprise provides endpoint and server protection.

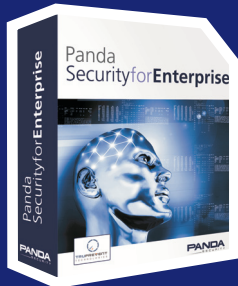

Installation of the products was fast and straightforward. Panda GateDefender "was installed and running in just one hour" while deployment of the client and server protection "took just a few minutes," says Lloyd.

One step ahead.

About Spartan Truck Hire

The story of Spartan Truck Hire has been one of humble beginnings to becoming a major player in South Africa's truck hire market. Through providing an invaluable service to its many clients, Spartan has experienced strong growth over the past 21 years.

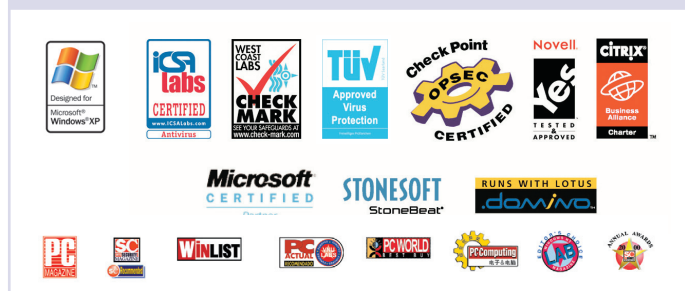

To guarantee quality of service, its IT systems must operate perfectly, without interruptions caused by malware. To this end, it sought advice from FFG Connection CC, its Internet service provider, who recommended Panda Security solutions.

Lee Lloyd has noticed numerous advantages since Panda Security began protecting Spartan Truck Hire. The monthly Internet bill has dropped as a result of improved bandwidth consumption - something that can be directly attributed to a Panda's effectiveness in eliminating spam and malware.

As an added advantage, the Panda Security for Enterprise administration console eases the task of managing protection across networked computers. Lloyd says it's "really easy, I just don't have to worry about it."

In short, Panda Security has offered a product that will truly protect the network of Spartan Truck Hire, as its IT manager can testify: "Excellent products - I recommend them to other companies and clients."
